

Nano IP Series - IPn1320

Miniature OEM Wireless Ethernet/Serial/USB Gateway

The Nano IP Series adds Ethernet capability to the miniature, yet powerful Nano platform. This incredibly small Ethernet Bridge and Serial Gateway provides robust wireless communication of simultaneous serial data and IP/Ethernet packets to extend serial data and IP networks.

Applications

- Unmanned Aerial Vehicles
- Unmanned Ground Vehicles
- Drones
- Wireless Video, Telemetry
- Research and Development
- Robotics

Microhard Systems Inc.'s proprietary radio technology excels in the most demanding RF and physical environments.

Weights only 25grams!

World's Smallest Ethernet/Serial/USB Gateway!

The Nano IP platform is the smallest form factor (2" x 1.25" x .5", weighing only 25 grams) available which offers a full Ethernet/Serial/USB bridge and routing functionality. The Nano IP OEM module can be directly integrated into OEM systems or applications using a variety of interface options. With the LAN out interface ready to wire directly to CAT5 cable OEMs can integrate this unit quickly and efficiently. The Nano IP Series also features flexible maintenance utilities, secure firewall features and network management facilities. Robust Frequency Hopping with excellent receiver sensitivity and interference rejection allow for long range, high speed communications.

Features of the Nano IP Series

- Low Power Consumption
 - Up to 1.2 Mbps Wireless Link Rate*
 - Master, Slave, Repeater operation in a single unit
 - HV Option provides a quick wiring solution with Ethernet and Serial Levels and Power (7-30 VDC)
 - 2 Serial Com Ports, 1 USB Port, and 1 Ethernet Port
 - Supports Point-to-Point, Point-to-Multipoint, Repeater, Peer-to-Peer
 - Adjustable transmit power (100mW - 1W)
 - Radius Server Support
 - Full VLAN Support (for separate management and Data networking)
 - User interface through local console, telnet, and web browser
 - Network management capability with SNMP V1, V2, V3
 - Local and remote wireless firmware upgrading through FTP
 - QoS Routing on Serial, IP, or Logic Ports
